Fortress Anchors

\$10 Coupon

"The World's Best Anchor" - 1/2 the weight and up to 4x the holding power
In test after test, from coast to coast and from around the world, no anchor in history has been called "**The World's Best Anchor**" by more boaters and respected marine experts than Fortress...and for good reason. Two convenient settings: one 32 degree fluke angle for sand and another 45 degree for soft mud boating conditions.

Fortress Anchors, hardened high-tech aluminum magnesium alloy, set fast, have optimum holding power and do not "plow" under load and storm conditions.

Used by the US Navy & Coast Guard , approved by the American Bureau of Shipping (ABS)

Anchor	Boat Size	Fortress Anchor Weight
FX7	16-27 ft boat	4lb
